SUBJECT INDEX

Ability to consent
  physical restraint during procedures: implications for practice, 258-263
Acute lymphoblastic leukemia (ALL)
  assessment of chemotherapy-induced oral complications in, 33-39
  biobehavioral research, 128-131
  quality of life: current status and future challenges, 137-140
Adolescent Resiliency Model (ARM), 288-306
Adolescent siblings
  psychosocial adjustment of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
Adolescents with cancer
Adolescent Resiliency Model (ARM), 288-306
  adventure therapy as mental health promotion strategy, 103-109
  information needs of, 327-335
  outcomes: the adolescent/young adult experience, 145-148
  survivors' knowledge of their disease and effects of treatment, 98-102
Advanced practice nurses
  central line placement: a model of collaboration, 16-21

SUBJECT INDEX

Ability to consent
  physical restraint during procedures: implications for practice, 258-263
Acute lymphoblastic leukemia (ALL)
  assessment of chemotherapy-induced oral complications in, 33-39
  biobehavioral research, 128-131
  quality of life: current status and future challenges, 137-140
Adolescent Resiliency Model (ARM), 288-306
Adolescent siblings
  psychosocial adjustment of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
Adolescents with cancer
Adolescent Resiliency Model (ARM), 288-306
  adventure therapy as mental health promotion strategy, 103-109
  information needs of, 327-335
  outcomes: the adolescent/young adult experience, 145-148
  survivors' knowledge of their disease and effects of treatment, 98-102
Advanced practice nurses
  central line placement: a model of collaboration, 16-21

^{131}I-MIBG treatment for neuroblastoma, nursing challenges with, 9-15
Adventure therapy
as mental health promotion strategy, 103-109
Adverse drug events
voluntary incident reporting: CIRIS system, 200-205
Aspergillus
total fungus and *Aspergillus* on a hematopoietic stem cell transplantation (HSCT) unit, 67-78
Assessment measurement
quality of life: current status and future challenges, 137-140
Association of Pediatric Oncology Nurses (APON) 28th Annual Conference (editorial), 257

Biobehavioral research
advancing biobehavioral research, 128-131
research from past successes through collaboration to future transdisciplinary research, 123-126
Bland-Altman method
comparison of methods for obtaining blood specimens, 320
Blood specimens
comparison of methods for obtaining, 320
Bone marrow transplants, *see* Hematopoietic stem cell transplantation
Brain tumors
biobehavioral research, 128-131
parental concerns and stressors by phase of illness, 87-95

Caloric intake
comparison of calorie and protein intake in hospitalized patients dining with a caregiver vs patient dining alone, 223-232
Central nervous system (CNS) tumors
biobehavioral research, 128-131
childhood brain tumors: parental concerns and stressors by phase of illness, 87-95
Central venous catheter
central line placement: a model of collaboration, 16-21
comparison of methods for obtaining blood specimens, 320
Chemotherapy
oral assessment of chemotherapy-induced oral complications in leukemia and lymphoma patients, 33-39
rapid hydration protocol to prevent chemotherapy errors, 22-26
virtual chemotherapy unit to speed admissions process, 27-32
Chemotherapy Incident Reporting and Improvement System (CIRIS), 200-205
Chemotherapy-induced mucositis, *see* Mucositis
Chemotherapy safety
voluntary incident reporting (editorial), 199
voluntary incident reporting: lessons from the field, 200-205
Childhood Cancer Survivor Study (CCSS)
progress in childhood cancer survival, 160-163
Chronic transfusion therapy
quality of life among children with sickle cell disease receiving CTT, 207-213
Clinical trials
nurses' perceptions of phase I clinical trials: literature review, 343
Collaboration
central line placement: a model of collaboration, 16-21
research from past successes through collaboration to future transdisciplinary research, 123-126
Communication in cancer care
a culturally-informed research agenda, 150-153
see also Cultural competence; Informational needs
Computerized order entry
virtual chemotherapy unit to speed admissions and prevent errors, 27-32
Coping
Adolescent Resiliency Model (ARM), 288-306
Cultural competence
communication in cancer care: a culturally-informed research agenda, 150-153
delivery of culturally competent care to Latino children and families, 155-158
Cytokines
Insuflon vs subcutaneous injection for cytokine administration: randomized crossover study, 79-85

Death and dying
end-of-life research as priority, 175-178
relationship-based research in pediatric end-of-life care, 180-184
Dependent-care advice
survey of self-care and dependent-care advice given by nurses, 214-221
Discard method
comparison of methods for obtaining blood specimens, 320
Diversity, *see* Cultural competence; Cultural diversity; Ethnicity

Eating
comparison of calorie and protein intake in hospitalized patients dining with a caregiver vs. patient dining alone, 223-232
Education
for children and adolescents with cancer, *see* Informational needs
End-of-life care
end-of-life research as priority, 175-178
relationship-based research in pediatric end-of-life care, 180-184
Error reduction
rapid hydration protocol to prevent chemotherapy errors, 22-26
virtual chemotherapy unit to speed admissions and prevent errors, 27-32
Ethics
physical restraint during procedures: implications for practice, 258-263
Ethnicity
see also Cultural competence

Families
biobehavioral research, 128-131
comparison of calorie and protein intake in hospitalized patients dining with a caregiver vs. patient dining alone, 223-232
end-of-life research as priority, 175-178
psychosocial adjustment of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
relationship-based research in pediatric end-of-life care, 180-184
self-care and dependent-care advice given by nurses, 214-221
stressors associated with Pacific Islands children diagnosed with cancer and severe blood disorders, 40-49
see also Parents of children with cancer
Fatigue
symptom management research in children, 132-135
Food intake
comparison of calorie and protein intake in hospitalized patients dining with a caregiver vs. patient dining alone, 223-232
Fungus
total fungus and *Aspergillus* on a hematopoietic stem cell transplantation (HSCT) unit, 67-78

Granulocyte-colony stimulating factor (G-CSF) Insuflon vs subcutaneous injection for cytokine administration: randomized crossover study, 79-85
Growth of children
weight gain and height velocity 1 year following bone marrow transplant, 358
Guidelines
Children's Oncology Group Long-term Follow-up Guidelines and Health Links, integration of in clinical practice, 271-280

Hematopoietic stem cell transplantation (HSCT)
levels of total fungus and *Aspergillus* on a pediatric HSCT unit, 67-78
psychosocial adjustment of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
social environment of outpatient bone marrow transplant clinic, parental views of, 264-270
weight gain and height velocity 1 year following BMT, 358
Holding down, physical restraint during procedures: implications for practice, 258-263
Hydration, rapid hydration protocol to prevent chemotherapy errors, 22-26

^{131}I-MIBG treatment
nursing challenges in children's treatment with, 9-15
Incident reporting
patient safety and voluntary incident reporting (editorial), 199
voluntary incident reporting: lessons from the field, 200-205
see also Medical errors; Patient safety
Informational needs
of adolescents with cancer, 327, 335
childhood brain tumors: parental concerns and stressors by phase of illness, 87-95
Children's Oncology Group Long-term Follow-up Guidelines and Health Links, integration of in clinical practice, 271-280
survivors' knowledge of their disease and effects of treatment, 98-102
Injection
Insuflon vs subcutaneous injection for cytokine administration: randomized crossover study, 79-85
Insuflon
vs subcutaneous injection for cytokine administration: randomized crossover study, 79-85
Interdisciplinary teams
^{131}I-MIBG treatment for neuroblastoma, nursing challenges in children's treatment with, 9-15
Invasive aspergillosis
total fungus and *Aspergillus* on a hematopoietic stem cell transplantation (HSCT) unit, 67-78

Late effects
Children's Oncology Group Long-term Follow-up Guidelines and Health Links, integration of in clinical practice, 271-280
monitoring: model of care for survivors, 170-174
Latino patients
delivery of culturally competent care to Latino children and families, 155-158
Leukemia
biobehavioral research, 128-131
chemotherapy-induced oral complications in, assessment of, 33-39
Long-term survival, *see* Survival; Survivors
Lymphoma
assessment of chemotherapy-induced oral complications in, 33-39

Medical errors
patient safety and voluntary incident reporting (editorial), 199
rapid hydration protocol to prevent chemotherapy errors, 22-26
virtual chemotherapy unit to speed admissions and prevent errors, 27-32
voluntary incident reporting: lessons from the field, 200-205
Mental health promotion (MHP)
adventure therapy as MHP strategy, 103-109
Model of care
for long-term survivors, 170-174
Mucositis
in leukemia and lymphoma patients, oral assessment of, 33-39
prevention and treatment guide for nurses, 281-287
symptom management research in children, 132-135
Multiculturalism
see Cultural competence; Cultural diversity; Ethnicity

National Institute of Nursing Research (NINR)
adolescent/young adults: outcomes, 145-148

biobehavioral research, 128-131
communication in cancer care: a culturally-informed research agenda, 150-153
end-of-life research as priority, 175-178
health-related quality of life: current status and future challenges, 137-140
integrating the child into home and community after completion of treatment, 165-168
monitoring late effects after childhood cancer, 170-174
moving research agenda forward (editorial), 121-122
moving the research agenda forward, 186-188
progress in childhood cancer survival, 160-163
relationship-based research in pediatric end-of-life care, need for, 180-184
research from past successes through collaboration to future transdisciplinary research, 123-126
symptom management research in children, 132-135
Nausea and vomiting
symptom management research in children, 132-135
Neuroblastoma
nursing challenges in ^{131}I-MIBG treatment, 9-15
Neuropathic pain
in children with cancer, 350
Nontraditional settings
social environment of outpatient bone marrow transplant clinic: parental views of, 264-270
Nursing, pediatric oncology
nurses as agents of change (editorial), 7-8
nurses' perceptions of phase I clinical trials: literature review, 343
self-care and dependent-care advice given by nurses, 214-221
Nutritional concerns
comparison of calorie and protein intake in hospitalized patients dining with a caregiver vs. patient dining alone, 223-232
symptom management research in children, 132-135
weight gain and height velocity 1 year following bone marrow transplant, 358

Opportunistic infection
total fungus and *Aspergillus* on a hematopoietic stem cell transplantation (HSCT) unit, 67-78
Oral side effects
in leukemia and lymphoma patients, assessment of, 33-39
mucositis: prevention and treatment guide for nurses, 281-287
Outcome research
the adolescent/young adult experience, 145-148
communication: a culturally-informed research agenda, 150-153
progress in childhood cancer survival, 160-163

Pacific Islanders
stressors associated with Pacific Islands children diagnosed with cancer and severe blood disorders, 40-49
Pain
Insuflon vs subcutaneous injection for cytokine administration: randomized crossover study, 79-85
neuropathic pain in children with cancer, 350
physical restraint during procedures: implications for practice, 258-263
quality of life among children with sickle cell disease receiving chronic transfusion therapy, 207-213
symptom management research in children, 132-135
Palliative care
end-of-life research as priority, 175-178
relationship-based research in pediatric end-of-life care, need for, 180-184
Parents of children with cancer
brain tumors: parental concerns and stressors by phase of illness, 87-95
end-of-life research as priority, 175-178
relationship-based research in pediatric end-of-life care, 180-184
self-care and dependent-care advice given by nurses, 214-221
social environment of outpatient bone marrow transplant clinic, parental views of, 264-270
stressors for Pacific Islands children diagnosed with cancer and severe blood disorders, 40-49
see also Families
Patient education, *see* Informational needs
Patient safety
patient safety and voluntary incident reporting (editorial), 199
promotion through pediatric chemotherapy and biotherapy provider program (editorial), 65-66
voluntary incident reporting: lessons from the field, 200-205
see also Error reduction; Medical errors
Phase I clinical trials
nurses' perceptions of: literature review, 343
Physical restraint
implications for practice, 258-263
Posttraumatic stress symptoms (PTSS)
in childhood and adolescent cancer patients, 128-131
psychosocial adjustment of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
quality of life: current status and future challenges, 137-140
Prehydration
rapid hydration protocol to prevent chemotherapy errors, 22-26
Protein intake
comparison of calorie and protein intake in hospitalized patients dining with a caregiver vs. patient dining alone, 223-232
Psychosocial adjustment
Adolescent Resiliency Model (ARM), 288-306
of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
the adolescent/young adult experience and outcomes, 145-148
Psychosocial functioning
of childhood and adolescent cancer patients, 128-131
Push-pull method
comparison of methods for obtaining blood specimens, 370

Quality of life
Adolescent Resiliency Model (ARM), 288-306
among children with sickle cell disease receiving chronic transfusion therapy, 207-213
current status and future challenges, 137-140
mucositis: prevention and treatment guide for nurses, 281-287

Radioisotope therapy
^{131}I-MIBG treatment for neuroblastoma, nursing challenges with, 9-15
Reintegration
integrating the child into home and community after completion of treatment, 165-168
Relationships
relationship-based research in pediatric end-of-life care, 180-184
see also Families; Parents of children with cancer
Relocation support
stressors associated with Pacific Islands children diagnosed with cancer and severe blood disorders, 40-49
Remission, *see* Survival; Survivors
Research
the adolescent/young adult experience, 145-148
advancing biobehavioral research, 128-131
communication in cancer care: a culturally-informed research agenda, 150-153
end-of-life research as priority, 175-178
integrating the child into home and community after completion of treatment, 165-168
monitoring: model of care for survivors, 170-174
moving research agenda forward (editorial), 121-122
moving the research agenda forward, 186-188
from past successes through collaboration to future transdisciplinary research, 123-126
relationship-based research in pediatric end-of-life care, need for, 180-184
symptom management research in children, 132-135
Resilience
Adolescent Resiliency Model (ARM), 288-306
Resources
brain tumors: parental concerns and stressors by phase of illness, 87-95

Safety, *see* Error reduction; Medical errors; Patient safety

Self-care
survey of self-care and dependent-care advice given by nurses, 214-221
Self-concept
adventure therapy as mental health promotion strategy for adolescents, 103-109
Siblings
psychosocial adjustment of adolescent siblings of hematopoietic stem cell transplant patients, 233-246
Sickle cell disease
quality of life among children receiving chronic transfusion therapy, 207-213
Social environment
of outpatient bone marrow transplant clinic: parental views of, 264-270
Stomatitis
oral assessment of chemotherapy-induced oral complications in leukemia and lymphoma patients, 33-39
Stressors
brain tumors: parental concerns and stressors by phase of illness, 87-95
for Pacific Islands children diagnosed with cancer and severe blood disorders, 40-49
Suffering
end-of-life research as priority, 175-178
relationship-based research in pediatric end-of-life care, need for, 180-184
Surveys
self-care and dependent-care advice given by nurses, 214-221
Survival
monitoring late effects after childhood cancer, 170-174
progress in childhood cancer survival, 160-163
Survivors
childhood and adolescent cancer survivors' knowledge of their disease and effects of treatment, 98-102
Children's Oncology Group Long-term Follow-up Guidelines and Health Links, integration of in clinical practice, 271-280
integrating the child into home and community after completion of treatment, 165-168
monitoring late effects after childhood cancer, 170-174
Symptom management
the adolescent/young adult experience, 145-148
clinical research studies and, 132-135
end-of-life research as priority, 175-178
self-care and dependent-care advice given by nurses, 214-221

Technology
virtual chemotherapy unit to speed admissions and prevent errors, 27-32
Total fungus
on a hematopoietic stem cell transplantation (HSCT) unit, 67-78
Transdisciplinary research
research from past successes through collaboration to future transdisciplinary research, 123-126

Virtual chemotherapy unit
to speed admissions and prevent errors, 27-32
Voluntary incident reporting
editorial, 199
lessons from the field, 200-205
Young adults with cancer
outcomes: the adolescent/young adult experience, 145-148
see also Adolescents with cancer
